(1) Instead of receiving interest on your savings, your qualifying savings and current account balances are offset against your outstanding mortgage balance, so you only pay mortgage interest on the difference between the two.

Although you don't earn credit interest on your savings or current account, as an example you could effectively achieve the same overall benefit as an account paying 3.8% AER. These figures are based on our standard variable rate and you could receive a higher or lower equivalent rate depending on your current mortgage. Linked accounts could include 1st Account, Everyday Savings Account and Savings Account.

Please note that Everyday Savings Accounts are no longer on sale.

Interest is applied to the net debit position after the balances of all accounts linked with the Offset Mortgage have been aggregated. Credit interest is not paid on accounts linked with the Offset Mortgage. Linked accounts can include 1st Account, Everyday Savings Account and Savings Account. Fixed rate mortgage funds are limited and rates vary according to each offer.

Your interest rate will never be a negative figure.

Think carefully before securing other debts against your home. Your home may be repossessed if you do not keep up your repayments on your mortgage.

Costs and Charges Disclosure

Below are the aggregated annualised costs based on an assumed investment amount of £10,000 and an annual growth rate of zero. A breakdown of these costs and charges is available on request. For Investment Trusts and Exchange Traded Funds where any further charges for the product applies, you will be supplied with the relevant Costs and Charges Disclosure Document (where applicable) ahead of any transactions.

Cost Category	% of Investment Account	Costs
Total Service Costs	0.42	£42.00

We are required to display the total service costs as a percentage value of the total investment amount, based on an investment of £10,000 as an illustration. However, this is a set fee and will be the same regardless of the investment amount.

The below table provides an illustrative view of the cumulative impact of the Total Costs on the assumed investment amount over a period of 3 years with an assumed annual growth rate of zero. The Total Costs will have an impact on your investment return. Whilst performance cannot be guaranteed we are able to give you examples of how the charges will affect what you might get back.

	Costs (£)
What might you get back if there were no charges	10,000
What the cumulative costs could be	126.00
What you might get back after charges	9,874.00

The actual costs incurred may differ depending on your investment amount.

*Charges marked with a * are not set by first direct and are therefore outside of first direct's control. All other charges are set by first direct.

Important notes

We're covered by the Financial Services Compensation Scheme (FSCS) which can pay compensation to depositors if a bank is unable to meet its financial obligations. Most depositors are covered by the scheme and where necessary an eligible depositor can claim up to the current FSCS limit for deposits. For joint accounts, each account holder can claim their share so, for joint account held by two eligible depositors, each can claim up to the FSCS deposit limit ie 2 x the current FSCS deposit limit. The FSCS deposit limit applies to the combined amount in all the eligible depositor's accounts with us including their share of any joint account(s), not to each separate account.

first direct and HSBC are both trading names of HSBC UK Bank plc. Customers who hold deposits with both will only be eligible to make one claim, up to the FSCS deposit limit.

For further information about the scheme including the current limits, amounts covered and eligibility to claim please visit the FSCS website fscs.org.uk or call them on 020 7741 4100 or 0800 678 1100.

Please note only compensation related queries should be directed to the FSCS.

We offer a variety of services for disabled customers, please contact us for further details.
